ROSES and PLANTS

PETITE KNOCK OUT[®]

'Meibebino' | PP 30,811

U.S. Pat. No. 11,252,928

-  Breakthrough breeding
-  Perfect for containers or small borders
-  Full sun
-  Dark green, extremely glossy
-  Mature plants are 18" tall
-  Zones 4–10
-  Fire engine, non-fading red
-  House of Meilland[®]

This is the first ever, miniature rose with extreme black spot resistance, featuring the characteristics of a Knock Out[®] and a Sunblaze[®] rose. Long lasting, bright red flowers on top of unique, dark and shiny green foliage are perfect for containers and small spaced gardens. Hardy to Zone 4.

THE PLANT

HABIT:	Very compact
INFLORESCENCE:	Usually 1 to 3 blooms per stem
DISEASE TOLERANCE:	Exceptional for the type
FLOWER SIZE:	1½”

FINISHING INFORMATION

MEDIA:	A well-drained media with high organic matter is recommended.
MEDIA PH:	5.5–6.5
MEDIA EC:	1–2
LIGHTING:	Whether growing indoors or outdoors, this variety likes high light intensity. Morning to early afternoon sun is recommended during the growing season.
MOISTURE:	Maintain consistent moisture, allowing the media to dry down slightly between watering. Avoid over watering and under watering, which will create stress, possible defoliation, and more susceptibility to pests and diseases.
FERTILIZER:	20-20-20 or 15-10-12 Recommend application of a slow-release fertilizer, supplementing with liquid feed as needed. Iron chelate may need to be applied particularly if leaf chlorosis is observed.
COMMON PEST AND DISEASE:	Aphids, powdery mildew and downy mildew
TRIMMING AND DISBUDDING:	This variety will continue to set buds. It's important to disbud young plants in the first 12 weeks of production to help the plant put more energy into the root system and bulk the plant for sales. Flowers will show color in 5–6 weeks after disbudding/trimming.

PGR'S:	None needed, plants naturally maintain a very compact size.
FINISHING TIMES:	Long cycle plugs: Plant plugs in late summer, allow to go dormant, trim in late winter and finish for spring sales in 8–10 weeks.
FINISHING TIMES:	Short cycle plugs: 2 quart: 72 cell input finishes in approximately 18–20 weeks with two pinches (planted in spring). If grown with the tray, every other plant should be removed to give the plant adequate space to grow evenly. 6 quart: 32 cell input finishes in approximately 18–20 weeks with two pinches (planted in spring). Bare root: Approximately 8–10 weeks to finish in a 6-quart container
ADDITIONAL NOTES:	Individual flowers will last a long time on the plant, up to 4 weeks.

BREEDING, PROPAGATION, REPRODUCTION FROM OR DEVELOPMENT OF THIS VARIETY IS STRICTLY PROHIBITED.
